

About xtrawrkx

Hardware is hard. So is our core.

At **xtrawrkx**, we help you solve next-level challenges — smart wrkx-style. From advisory to execution, we build solutions to address **xtra hard problems** in automotive and manufacturing industries, especially around **electric vehicles (EVs), drones, and consumer electronics**.

Who We Are

Founded in **late 2022** and headquartered in **Bengaluru, India**, xtrawrkx is a privately held advisory and consulting firm led by senior professionals and supported by a flexible network of domain experts. We operate at the intersection of **technology, operations, and business strategy**, serving both high-growth startups and established manufacturers.

What We Do

Our offerings span three interconnected lines of work:

- **Management Consulting**

Strategic and operational advisory, program leadership, investor & SPV structuring, and executive-level problem-solving.

- **Contract Manufacturing / Build-Operate-Transfer (BOT)**

We incubate and run entire business units on behalf of clients — building teams, managing suppliers, owning risk — then transfer once systems are stable.

- **Startup Factory**

An ecosystem launchpad for EV-focused ventures and initiatives. We co-create go-to-market strategies, build partnerships, and nurture innovation from zero to scale.

Mission

To accelerate the success of hardware-led ventures by delivering sharp, scalable, and deeply collaborative solutions — bridging the gap between ideas and execution.

Vision

To become the most trusted **zero-to-one-and-beyond** partner for businesses navigating complex challenges in the EV, mobility, and smart manufacturing landscape — in India and beyond.

Core Values

First Principles Thinking

We question assumptions and design from fundamentals — always aiming for elegant, fit-for-purpose solutions.

Skin in the Game

We take ownership like insiders. Our success is tied to our client's outcomes.

Execution Over Ego

We value traction over talk. No fluff, just results.

Ecosystem Mindset

We believe transformation happens faster when stakeholders collaborate. We build, partner, and co-create.

Integrity & Transparency

Clear communication, no hidden agendas — always aligned with long-term value.

Challenges We Tackle

We step in where most struggle or stall:

- EV engineering, validation & compliance
 - Delays in program & product delivery
 - Talent gaps and high onboarding risk
 - Vendor development and supply chain scale-up
 - Strategic partnerships, M&A, and SPVs
 - GTM and pilot-stage execution for new ventures
-

Why Choose xtrawrkx?

- **Cross-functional domain depth** in automotive, drones, electronics, and industrial hardware
 - **Lean, modular execution** model through our flexible consulting + delivery network
 - Access to a curated **ecosystem of 4,000+ partners** and experts
 - Track record in **de-risking investment and accelerating time-to-impact**
-

Let's Connect

If you're building the future of mobility, energy, or smart hardware — and need strategic and operational lift — we're ready to wrkx with you.
